	CENTRAL INTE	ELLIGENCE AGENCY REPORT	
	INFORMAT	TION REPORT CD NO.	
COUNTR	Y limitery	DATE DISTR. 4 0 0 19:	54
SUBJECT	Bazakerettye Oil Field	NO. OF PAGES 3	
PLACE ACQUIRE	CD D	NO. OF ENCLS. 1 (LISTED SELOW) Encl. A	50X1-H
ATE COUIRE	ED	SUPPLEMENT TO REPORT NO.	
ATE OF	INFORMATION		
	ar Contains information structure the sational structure to state. Structure the sational structure to state. State the sational structure to state. State to the sational state to the sational state to the castant of the sational structure to the castant of the sational state to the sational state.	THIS IS UNEVALUATED INFORMATION	
			50X1-H
2.	- 8nd Aslasgerszeg and extended to	located in the area between Nagykanizon o the southern border of Hungary. The	
ž v	and Dalaegerazeg and extended to area was approximately 400 squar came from wells in the Barakere of Barakerettye, oil extracted:	o the southern border of Hungary. The re kilometers in sinc. The best oil ttye area. At Lovaszi, 18 klms south. from the wells was so pure that it was	
	and Dalaegerazeg and extended to area was approximately 400 squar came from wells in the Bacakere of Bazakerettye, oil extracted of public use in Diesel tractors with In April 19-9, there were 138 of which 116 were in operation. In were on operation. The oil was	o the southern border of Hungary. The re kilometern in sinc. The best oil type area. At Lovassi, 18 klms south. from the wells was so pure that it was ithout any forther processing. il wells in the Bazukerettym area of a sed around Lomasni, 28 of 32 wells extracted by man pressure (natural)	
	and Almagarazeg and extended to area was approximately 400 squarasme from wells in the Barakere of Barakerettye, oil extracted that to use in Diesel tractors with the use in Diesel tractors with the Liberary in operation. In our or operation. In our or operation. The oil was said by jums. A proximately 24	o the southern border of Hungary. The re kilometern in sine. The best oil taye area. At Lovaszi, 18 klms south. from the wells was so pure that it was ithout any further processing. il wells in the Bazukerettye area of a set around lovaszi. 28 of 30 males.	
₫•	and Zalaegerazeg and extended to area was approximately 400 squarement from wells in the Barakere of Bazakerettye, oil extracted that to use in Diesel tractors with the 110 serie in operation. In were in approximately 24 with Tomps. The depth of the west of the wells were drilled angines, oil fired, were also en	o the southern border of Hungary. The re kilometers in sine. The best oil type area. At Lovassi, 18 klms south from the wells was so pure that it was ithout any forther processing. il wells in the Basakerettys area of a sid around lowasmi, 28 of 36 wells extracted by gas pressure (natural) of the Basakerettys wells were continued.	
3.	and Zalaegerazeg and extended to area was approximately 400 squares from wells in the Barakerer of Barakerettye, oil extracted that to use in Diesel tractors with the Use in Diesel tractors with the Use in Diesel tractors. In wore on approximately, the oil was and by pumps. Approximately 24 with numps. The depth of the west of the vells were drilled wengines, oil fired, were also endine fueled generator produced to Dil storage tank forms were loss Basakersttye in Lispe, Basa Zsig Enclosure, eketch of Basakerettye	o the southern border of Hungary. The re kilometers in since. The best oil type area. At Lovassi, 18 klms south from the wells was so pure that it was ithout any forther processing. il wells in the Bazakerettys area of maid around lowassi, 28 of 32 wells extracted by gas pressure (natural) of the Bazakerettys wells were equipped ells ranged from 2000 meters (the despect) with rigs driven by Dieacl Motors. Steam exployed in drilling operations. A gase—the required electricity for the oil field . Ated within a five kilometer radius of c., Budafa, Kamahaza, and Kisosehi. See the tanks were fulled by electricity for that a pumping station that runged	
3. 4.	and Allegerage and extended to area was approximately 400 squares from wells in the Barakere of Barakerstye, oil extracted of Barakerstye, oil extracted of Barakerstye, oil extracted of Barakerstye, oil extracted of the April 19-9, there were 138 of which 116 were in operation. The oil was said by pumps. Approximately 24 with rumps. The depth of the west of the wells were drilled wangines, oil fired, were also enline fueled generator produced to 0il storage tank farms were local Barakerstye in Lispe, Bara /sig Enclosure, sketch of Barakerstye fuel decrude oil to Budapest by pipe litthe fuel depot at Barakerstye in English fuel depot at Barakerstye in Studies of oil annual	o the southern border of Hungary. The re kilometers in since. The best oil type area. At Lovassi, 18 klms south from the wells was so pure that it was ithout any forther processing. il wells in the Bazakerettys area of maid around lowassi, 28 of 32 wells extracted by gas pressure (natural) of the Bazakerettys wells were equipped ells ranged from 2000 meters (the despect) with rigs driven by Dieacl Motors. Steam exployed in drilling operations. A gase—the required electricity for the oil field . Ated within a five kilometer radius of c., Budafa, Kamahaza, and Kisosehi. See the tanks were fulled by electricity for that a pumping station that runged	
3.	and Zalangerazeg and extended to area was approximately 400 squaresme from wells in the Barakere of Barakerettye, oil extracted to the Use in Diesel tractors with a public life term in operation. In were an operation. The oil was add by pumps. Approximately 24 with rumps. The depth of the wester of the wells were drilled wengines, oil fired, were also endine fueled generator produced to 0il storage tank farms were local Barakerettye in Lispe, Bara Zsig Enclosure, eketch of Barakerettye fuel decrude oil to Budapest by pipe limbs fuel depot at Barakerettye in English fuel depot at Barakerettye in Commission gallons of oil annual vicinity new capacities of 500 to	a the southern border of Hungary. The re kilometers in sine. The best oil type area. At Lovassi, 18 klms south from the wells was so pure that it was ithout any forther processing. il wells in the Bazakerettys area of a sid around lovasmi, 28 of 32 wells extracted by gas pressure (natural) of the Bazakerettys wells were equipped ells ranged from 2000 meters (the despost) with rigs driven by Dieacl Motors. Steam employed in drilling operations. A gase-the required electricity for the oil field. Ated within a five kilometer radius of g., Budafa, Kamahaza, and Kiscsehi. See g. The tanks were fulled by electricate that a pumping station that pumped lines. Mad facilities to handle approximately the smaller fuel depots in the shousand to 600 thousand gallons of oil each. Musted. Diesel tractors equipped with	
3.	and Zalaegerazeg and extended to area was approximately 400 squaresme from wells in the Barakere of Bazakerettye, oil extracted of Bazakerettye, oil extracted of Bazakerettye, oil extracted of Bazakerettye, oil extracted of the April 19-9, there were 138 of which 186 were in operation. The oil was said by pumps. The oil was said by pumps. The depth of the west of the wells were drilled wangines, oil fired, were also enline fueled generator produced to 0il storage tank farms were local Bazakerettye in Lispe, Baza /sig Enclosure, sketch of Bazakerettye fuel decrude oil to Budapest by pipe lithe fuel depot at Bazakerettye in 20 million gallons of oil annual vicinity has capacities of 500 to When & well in the area was exhatrailers, would haul all of the	co the southern border of Hungary. The re kilometers in sine. The best oil type area. At Lovassi, 18 klms south from the wells was so pure that it was ithout any further processing. il wells in the Bazakerettys area of maid around lowasmi, 28 of 32 wells extracted by gas pressure (natural) of the Bazakerettys wells were equipped ells ranged from 2000 meters (the despect) with rigs driven by Dieacl Motors. Steam applyed in drilling operations. A gase—the required electricity for the oil field. ated within a five kilometer radius of gard, Budafa, Kamahaza, and Kiscsehi. See got had a pumping station that pumped lines. and facilities to handle approximately live. The smaller fuel depots in the shousand to 600 thousand gallons of oil each. austed, Diesel tractors, equipped with rigging to a new oil field. - end -	
3.	and Zalaegerazeg and extended the area was approximately 400 squares was approximately 400 squares was approximately 400 squares and from wells in the Barakere of Bazakerattye, oil extracted from the use in Diesel tractors with the use in Diesel tractors with the use in operation. In were on approxime. The oil was said by pumps, approximately 24 with rumps. The depth of the west 900 meters. Most of the wells were drilled wengines, oil fired, were also enline fueled generator produced to its fueled generator produced to its fueled generator produced to Bazakerattye in Lispe, Baza /signumps. The Bazakerattye fuel decrude oil to Budapest by pipe little fuel depot at Bazakerattye had million gallons of oil annual vicinity had capacities of 500 to when s well in the area was exha	co the southern border of Hungary. The re kilometers in sine. The best oil type area. At Lovassi, 18 klms south from the wells was so pure that it was ithout any further processing. il wells in the Bazakerettys area of maid around lowasmi, 28 of 32 wells extracted by gas pressure (natural) of the Bazakerettys wells were equipped ells ranged from 2000 meters (the despect) with rigs driven by Dieacl Motors. Steam applyed in drilling operations. A gase—the required electricity for the oil field. ated within a five kilometer radius of gard, Budafa, Kamahaza, and Kiscsehi. See got had a pumping station that pumped lines. and facilities to handle approximately live. The smaller fuel depots in the shousand to 600 thousand gallons of oil each. austed, Diesel tractors, equipped with rigging to a new oil field. - end -	50X1-HUN
